SUGGESTIONS:

[5 Beauty Products for Wedding Day Touchups](#)

Get any color touchups 1 week prior to wedding day.

Be sure to shampoo & condition your extensions and lay flat to dry PRIOR to your trial & wedding day.

Have all steaming done prior to wedding day. Steam & hair = frizz!

OTHER. COMMON QUESTIONS:

How do you remember what you do during the trial?

I take pictures during your trial as well as notes afterwards to ensure I remember which products I used so you will get the same look on your actual wedding day.

Can I get my hair done for the Rehearsal Dinner?

If we aren't booked with a wedding, we would love to beautify you for your rehearsal dinner as well! If you go somewhere else (like a blow dry bar), that's totally fine! Just ask them to use minimal hairspray (so your hair isn't weighed down the next day).

When should I get my spray tan?

I would definitely do a 'test run' at least a month before your wedding date. Then, get your real spray tan 2-3 days before your wedding. Ex. Saturday wedding = spray tan on Thursday.

When should I get my hair trimmed?

This is more of a personal preference. I would suggest keeping as much length as possible. You can get a dusting or face framing trimmed 2+ weeks before. (Unless the ends of your hair look scraggly, I wouldn't stress about it.)

When should I get my brows tinted/waxed?

This depends on how long it lasts for you personally. Usually about 2 weeks before would be good.
